

Technical Data Sheet

Media Type: BR16

Description: Yellow/white filter media offering low to medium efficiency. Suitable for use in air-conditioning, ventilation or exhaust systems.

Application: Generally used in systems requiring low cost, low resistance filtration.

Sizes: Available in rolls 2.0 m x 20 m. Can also be supplied as lineal meterage, cut pads or bags.

Performance	
Classification:	Type 1, Class B
Weight:	350 g/m ²
Rating:	G3
Loft:	Approx 20 mm
Colour:	yellow/white
Rated velocity:	1.8 m/s
Initial pressure drop:	35 pa
Final pressure drop:	125 pa
Average arrestence:	85%
General specs:	Due to variations in raw materials (i.e. fibre denier), specifications may vary without notice

Maintenance: The media can be cleaned by back washing with cold water from a medium pressure hose. Allow the filter media to dry completely before re-installing. Washable filters can be washed a number of times before they require replacing however, filter performance will progressively deteriorate with each wash.

(Note: Local council or water restrictions may not permit the washing of filters or the run off from washed filters to enter storm water drains)
